LIBRARY matters

New Books!!!

Check out the new series by N.K. Jemisin, a fantasy writer for our times. Mr. Smee stocked up on many other Fantasy and SciFi classics this year. Stop by!

Almost all of our new titles have been entered into the system by our marvelous cataloger, Jan Itriago. Though we had a relatively small order this year, we targeted a few areas that needed some support. Many new fantasy and sci-fi authors have been incorporated, including classics from William Gibson, N.K. Jemisin, Isaac Asimov and Ursula LeGuin.

Another area we've looked to embellish are the non-fiction areas for middle and upper readers. For the middle school, we have ordered leveled readers around the topics of history and environment. Similarly, over ten new books on economics have been included for advanced readers. The IB students should make good use of the theoretical books for their research.

We are constantly ordering new books for the ECA collection. So if you have specific requests that fit within our ordering requirements, feel free to contact us at the library and put it on our wish list.

Returning Summer Books
Students who checked out books over the summer are expected to have them returned by September 3rd. The library does inventory at the beginning of the year to keep track of missing or damaged books. All missing books will be charged to student accounts if books are not returned, and their accounts will be limited until fines are paid. Thank you for your understanding.

Welcome back ECA Readers!!

Most of our new books have been cataloged and I want to mention just a few that caught my attention. Stop by and we will help you find the book that is just right for you.

“All Thirteen-- The Incredible Cave Rescue of the Thai Boys’ Soccer Team” is a great book telling about the incident that happened in 2018. It also has a lot of good pictures to accompany the text.

“How We Got to the Moon- The People, Technology, and Daring Feats of Science Behind Humanity’s Greatest Adventure” gives you a good idea of the hundreds and hundreds of people and inventions and events that led up to getting to the moon.

“The Midnight Library” by Matt Haig was one of my favorite new books.

“Somewhere out beyond the edge of the universe there is a library that contains an infinite number of books, each one the story of another reality”. What if you hadn’t chosen to....

“Think Like a Monk” by Jay Shetty is a very popular self-help kind of book. “He distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life.”

LIBRARY HOURS

The library is open for parents and students during the given times. The schedule is subject to change according to Covid-19 protocols.

MONDAY to FRIDAY

8:00 am

to

4:30 pm
